## 'ONLY A COUNTRY THAT INVEST IN RESEARCH CAN DEVELOP' - PROF. OLUKANNI

The Dean, Faculty of Basic Medical Sciences at Redeemer's University, Prof. Olumide David Olukanni has called on the Federal Government to make provision for an annual innovation grant for research

development and knowledge transfer in Nigeria as this will help the nation to develop faster. It is only a country that invest in research that can develop.

He made this assertion when he delivered the 14<sup>th</sup>

Inaugural Lecture Series tagged "Wonders Shall Never End: The Biotechnological Wonders of the Maker, the Man and Microbes" which was recently held at the Redeemer's

## ONLY A COUNTRY THAT INVEST IN RESEARCH CAN DEVELOP - PROF. OLUKANNI

Cont'd from Page 1

University Auditorium, Ede, Osun State.

The academic Don and lover of microbes highlighted that microbes in their efforts to clean the contaminated environment can break down and detoxify pollutants. He further stated that they have contributed immensely to the development of the human immune system as well as developments of vaccines and treatment. He said, "To harness the wealth of microbial diversity and the wonderful endowment in diversity, Nigeria needs to see biotechnology as a field of endeavour that can be used to solve many problems and come out of poverty. In a bid to alleviate poverty through harnessing microbial biodiversity in Nigeria, the Professor of Biochemistry, who specializes in Microbial Biotechnology and Molecular Biology stressed the need for the Federal Government to create a Ministry of Biotechnology, which will exist along with the present Ministry of Science and Technology.

"I want to urge the Federal Government of Nigeria to create a Ministry of Biotechnology while still retaining the Ministry of

Science and Technology; this will ensure purposeful development and funding of biotechnology," he said.

He, however, charged relevant ministries including the National Universities Commission, (NUC) to mandate the donation of basic equipment needed for biotechnological research to all tertiary institutions annually in order to ensure adequate scientific infrastructure in tertiary institutions.

Prof. Olukanni further urged the Federal Government to take microbes seriously by establishing and funding Nigerian Type Collection Centre (NTCC) which will be located in six biotechnology centres of the

six geo-political zones in Nigeria. He added that the ministry should be vested with the responsibility of establishing a laboratory in each of the six geopolitical zones of the nation.

Present at the event were; the Vice-Chancellor, Prof. Shadrach Akindele; Wife of the Inaugural Lecturer, Mrs Atinuke Olukanni; the Registrar, Mrs Mojisola Oje; Acting Bursar, Mrs Patience Saliu; the Librarian, Dr. Akinniyi Adeleke; Provost, College of Post-graduate Studies, Prof. Olalere Adeyemi; Dean, Faculty of Basic Medical Sciences represented by Prof. Chiagoziem Otuechere; scholars from other universities; members of staff; well-wishers and the students of the institution.

The Newly Inducted Graduands of Physiotherapy taking their Induction Oath

## MRTB APPLAUDS REDEEMER'S UNIVERSITY FOR KEEPING PHYSIOTHERAPY PROFESSION ALIVE

**M**edical Rehabilitation Therapists Board of Nigeria (MRTB) has applauded Redeemer's University for keeping the Physiotherapy profession alive by providing quality teachers and equipment necessary to train physiotherapy students despite the "Japa Syndrome."

The Council also appreciated the University for producing the workforce that will solve societal problems.

The Registrar, Medical Rehabilitation Therapists Board of Nigeria (MRTB), Prof. Ahmad Rufai made this statement during the 2nd Induction Ceremony of twenty-two (22) graduating students into the Physiotherapy profession for the Bachelor of Physiotherapy, held recently at the University Event Centre, Ede Osun State.

In his address, Dr Ahmad Rufai, commended the university for producing quality physiotherapists on a yearly basis, "Redeemer's University does not just produce graduates; they make sure that the quality of the graduate is good", he said.

Rufai told the inductees to be focused and be determined to get to

the peak of their career. He, however, urged them to have an area of specialisation, adding that it is unethical not to have a specialised area as a physiotherapist because "specialisation is the key," he said.

The Vice-Chancellor, Prof. Shadrach Akindede, who was represented by the Chairman, Committee of Deans of the University, Prof. Uchechukwu Vincent urged the inductees to uphold the values instilled in them by the University. He encouraged the inductees to live out the lessons they had learned and to always collaborate with their peers by doing everything to the glory of God.

Prof. O. G. Sokunbi from Bayero University, Kano, during his keynote speech addressed the inductees on the theme "The Emerging Physiotherapist in an Unlimited World." He highlighted the importance of telehealth services, virtual reality, robotics, and AI in enhancing patient care. He urged the inductees to stay updated with cutting-edge technology, collaborating with others, and leave a positive mark wherever they go.

The Registrar, Medical Rehabilitation Therapists Board of Nigeria (MRTB), Prof. Ahmad Rufai

In his remark, the Dean, Faculty of Basic Medical Sciences, Prof. Olumide Olukanni, urged the inductees to embrace the evolving profession with an unlimited mindset, he advised them to be unlimited in their ability to excel, collaborate, and make a lasting impact. He further encouraged them to share their field experiences, explore opportunities in hospitals and rehabilitation industries, and that they should not stop learning to improve.

The Acting Head, Department of Physiotherapy, Dr. Opeyemi Idowu, applauded the inductees for their resilience and hard work. He admonished them to cherish the highs and lows of their training, be team players, and uphold ethical standards as they positively represent the Redeemer's University brand in their professional careers.

## REDEEMER'S UNIVERSITY INDUCTS 76 STUDENTS INTO THE NURSING PROFESSION

**N**ot less than seventy-six (76) registered student nurses from the Department of Nursing Science, Redeemer's University were recently inducted into the Nursing profession at the Redeemer's University Event Centre.

The Dean, Faculty of Nursing, University of Ibadan, Prof. Prisca Adewumi, during her keynote speech explored the theme, "Embarking on a Journey Towards Excellence in Nursing Practice: the Myriad of Diversity and Opportunities," urged the inductees to pursue excellence and uphold the highest standards throughout their careers.

The Vice-Chancellor, Prof. Shadrach Akindele, who was represented by the Deputy

Vice-Chancellor Prof. Ahmed Yerima, reminded the inductees that nursing is a noble calling to serve humanity. He encouraged them to serve with love and care, just as they had been taught during their training, "be good and proud ambassadors of the profession," he said.

Dr. (Mrs.) Deborah Onisile, Head of the Nursing Science Department, offered encouraging advice to the new inductees, reminding them that their journey is a marathon, not a sprint. She urged them to stay persistent and never relent in their pursuit for excellence.

In his remarks, the Dean of the Faculty of Basic Medical Sciences, Prof. Olumide

Olukanni, urged the inductees to attend to their patients with patience and in an ethical manner. He also urged them to be open to changes and embrace new innovations. "You are stepping into the health environment that is changing and you must be open to changes," he said.

Prof. Olukanni, emphasized the importance of being "SMART" nurses. He encouraged the inductees to "Stay strong, Make a difference, Adapt to change, be Reliable, and maintain Trustworthiness". He stressed that these qualities are essential in providing the best care for their patients. "Learn new techniques and embrace new opportunities, believe in yourself and ability; this is important because smart and intelligent nurses are the future of health care," he said.

## EXPERTS ORGANISE TRAINING IN DATA SCIENCE, MEDICAL IMAGE ANALYSIS

**A** one-week special training in data science and medical image analysis (DATICAN) was hosted a few days ago by Redeemer's University, Ede, Osun State, to expose participants to supercomputers and High-Performance Computing (HPC) through collaboration with the University of Chicago and Argonne National Laboratory, USA.

Speaking at the opening program, the Principal Investigator of the project, Professor Benjamin Aribisala, described the programme as a necessity for those in the medical field and other fields of study.

Professor Aribisala highlighted the critical roles of Data Science in medical diagnosis as *nulli-secundus* and explained why the project was tailored towards building capacity in Data Science and its medical applications.

According to him, "this version of the training was called Hackathon 2.0, as the first version was Hackathon 1.0, which was hosted by Lagos State University in April 2024."

He stressed that "the project was tailored towards building capacity in Data Science and its medical applications."

While recounting the inception of DATICAN and how the idea was conceived at the University of Chicago, USA, in 2022 when he visited as a Fulbright Scholar, the academic don expressed happiness that the same idea is now successfully delivered in Nigeria.

On the importance of collaboration across disciplines, he noted that Data Science transcends traditional boundaries, particularly benefiting fields like medicine and other applied sciences.

Professor Aribisala hinted that "DATICAN has awarded some scholarships to outstanding participants, highlighting that the programme nurtures future leaders in Data Science and medical research."

In his own submission, the Chairman of the Local Organizing Committee at Redeemer's University, Professor Adewale Ogunde, commended Professor Aribisala for

his exemplary leadership in guiding the DATICAN team towards their achievements.

He also expressed gratitude to the sponsors of the Hackathon for their unwavering support and encouraged trainees to maintain their commitment to excellence in research and innovation.

Also, speaking at the opening, Professor Samson Arekete, a member of the DATICAN Steering Committee from Redeemer's University, emphasized the importance of delivering solutions in data science and medical diagnostics to fulfill the programme's objectives.

Present at the event were Professor Godwin Ogbole, a member of the DATICAN Steering Committee from the University of Ibadan; Dr. Hesham Gaafar, Guest Speaker from the University of Chicago; and some of the trainers, including Professor Olufade Onifade from the University of Ibadan, Dr. M. O. Odim, and Dr. (Mrs.) B. O. Oguntunde from Redeemer's University, as well as participants from different universities in Nigeria.
